

Procedures to be followed when importing plants and plant products into South Africa

Before importing into South Africa, an importer should:

1. Find out the phytosanitary import conditions that apply to the commodity to be imported by consulting the Agricultural Pests Act, 1983 (Act No. 36 of 1983) or the National Plant Protection Organisation of South Africa (NPPOZA) within the Department of Agriculture, Forestry and Fisheries (DAFF).
2. Apply for an import permit from the DAFF if the commodity to be imported is not exempted from an import permit in terms of the Act referred to above. If the commodity to be imported is exempted from an import permit, ensure compliance with phytosanitary measures for such exemption.
3. When applying for an import permit, submit the completed application form together with proof of payment. The tariff information with regard to the issuance of import permits and the application form are available on the departmental website (www.daff.gov.za »Branches» **Agricultural Production Health and Food Safety** »Plant Health »Importing into South Africa)
4. Forward a copy of the import permit to the exporter or supplier in the exporting country to ensure that the consignment to be exported meets the phytosanitary import requirements of South Africa.

**agriculture,
forestry & fisheries**

Department:
Agriculture, Forestry and Fisheries
REPUBLIC OF SOUTH AFRICA

- 
5. Ensure that the exporter or supplier presents the commodity to be imported to the National Plant Protection Organisation (NPPO) of the exporting country for phytosanitary inspection and certification where necessary in terms of the permit and/or exemption requirements.
 6. Inform the exporter or supplier to send the original phytosanitary certificate with the consignment to South Africa (if a phytosanitary certificate is required).

Procedures to be followed when imported commodities arrive at the port of entry in South Africa:

1. South African Revenue Services (SARS) will detain the commodities for inspection.
2. DAFF inspector/s from NPPOZA will inspect the consignment together with the accompanying documents.
3. The following may happen following inspection of the imported commodities.
 - (a) If the consignment meets the import requirements, it will be released by the DAFF inspector/s.
 - (b) If the consignment does not meet the import requirements, risk management measures will be recommended whereafter a consignment may either be treated and released, sent back to the country of origin or destroyed. Once the consignment has been released by the DAFF inspector/s, the importer or his/ her agent must take the import documents to SARS for final release.
